Mobile Units

Mobile units are sponsored vehicles that effectively provide a variety of support services and pop-up training sessions in rural communities.

OUTCOMES:

These refurbished vehicles are used to provide a variety of community support services, from BDS (business development support) services to pop-up training programmes, bursary sign-ups, data and airtime, electricity and more. The units are equipped with Wi-Fi and other technology sustained through long life batteries, charged via solar panels. This enables their functionality in rural environments and provides access to reliable services to under-resourced towns across South Africa.

Mobile units can become somewhat sustainable through sales of services, but mostly rely on sponsors to support the goodwill, opportunity and access to resources they represent for the rural communities.

SERVICES:

- Pop-Up Business Development Support: WiFi zone + Airtime & Data Sales
- Pop-up Support for Youth: Applying for Tertiary Education & Bursaries
- Pop-up Training Services: Short Courses & Facilitator Services

When you sponsor a Mobile Unit, you support rural development and entrepreneurship, helping us make a positive impact!
